

MySol Holdings & Logistics Website

Styling the MySol Holdings & Logistics Website

A unified visual identity using White, Blue & Orange

by: Lethabo Letshwiti

Date: 15 September 2026

Project: Website Development — CSS Phase

Purpose of the CSS Phase

Why we created a dedicated stylesheet for every page

Turn plain HTML into a professional, branded website

Establish a consistent colour identity across all 5 pages

Improve readability, layout and user experience

Make the site responsive works on desktop, tablet and mobile

Separate content (HTML) from design (CSS) for easier maintenance

Result: A single, cohesive brand identity that users can trust.

The Colour Palette

Three colours. One identity.

Colour	Hex Code	Where it's used
--------	----------	-----------------

White	#ffffff / #f8f9fa	Page backgrounds, cards, form fields
-------	-------------------	--------------------------------------

Blue	#0a3d6b / #1e7bc4	Header, headings, buttons, footer, hero banners
------	-------------------	---

Orange#e8751a / #c9600f Accents, hover states, highlights, CTA buttons

Why these colours?

Blue: trust, stability, professionalism perfect for a mining & logistics brand

Orange: energy, action, warmth draws attention to what matters

White: clarity and clean space for the content to breathe

Files We Created

One stylesheet per page for clarity and modularity

text

CSS/

|— index.css → Home Page

|— about.css → About Us Page

|— services.css → Services Page

|— enquiry.css → Enquiry Form Page

|— contact.css → Contact Page

Each file contains:

A shared base (reset, header, nav, footer, typography)

Page-specific styling (cards, forms, maps, team profiles, etc.)

This means: if a base style breaks, we fix it in one place and page-unique layouts stay independent.

Shared Header & Navigation

Consistent branding on every page

Logo displayed inside a soft circular frame with a light border

Organisation name ("MySol Holdings & Logistics") rendered as a gradient text blue for the first part, orange for "Logistics"

Gradient underline beneath the header: blue → orange

Navigation links turn orange on hover with an animated orange underline

Header is sticky it follows the user as they scroll

Result: Users always know which site they're on, and can navigate from anywhere.

Typography & Spacing

A clean, readable reading experience

Font: Segoe UI (modern, clean, cross-platform)

Line height: 1.7 comfortable for long paragraphs

Heading hierarchy:

h1: 2.4 rem (bold, page titles)

h2: 1.6 rem (section titles)

h3: 1.25 rem (sub-sections)

Section headings have a small orange accent bar underneath

Generous spacing between sections (2–3 rem)

Result: Content is easy to scan and easy to read.

Page 1: Home Page (index.css)

What we added

Hero section with a blue gradient background and a pulsing orange glow animation behind the heading

"What We Offer" services shown as hoverable cards that lift and turn orange on hover

"Get Involved" CTA full-width orange gradient panel with a white pill button that turns blue on hover

Footer dark blue gradient with orange top border

Result: A powerful first impression that shows who we are and invites action.

Page 2: About Us (about.css)

What we added

Blue gradient page banner with pulsing orange glow

Our History card a thick blue left border with an orange dot marker, giving a timeline feel

Mission & Vision styled as coloured pill labels (blue for Mission, orange for Vision)

Core Values grid of cards with an orange top bar that slides in on hover

Meet Our Team profile cards with a circular photo frame:

Blue ring by default

Turns orange on hover

Card slides right for a dynamic feel

Result: An engaging page that tells our story and introduces the people behind it.

What we added

Blue gradient banner introducing the services

Three service cards in a grid (3 columns on desktop, 2 on tablet, 1 on mobile):

Blue top border that turns orange on hover

Orange corner glow that expands on hover

"Enquire Now" button that shifts blue ,orange on hover

"Why Choose Us" full-width blue gradient panel with:

Frosted-glass feature cards

Orange bullet markers

Subtle lift animation on hover

Result: Our services are presented like real product offerings clear, attractive, and easy to enquire about.

Page 3: Services (services.css)

What we added

Blue gradient banner with a pulsing orange glow

Two fieldsets styled with pill-shaped legends:

"Personal Information" blue pill

"Enquiry Details" orange pill

Form inputs with soft grey borders that glow orange on focus

Submit button blue gradient pill turns orange on hover

Reset button transparent outline glows orange on hover

Contact info panel full-width blue gradient with orange accents

Result: A clean, friendly, easy-to-fill-out form that encourages enquiries.

Page 4: Enquiry Form (enquiry.css)

Page 5: Contact (contact.css)

What we added

Blue gradient banner introducing the page

Two office cards side-by-side:

Head Office blue top border

Branch Office orange top border

Each contains address, phone, email, hours, and an embedded Google Map

Maps get an orange border glow on hover

Contact Form card orange top border; inputs glow orange on focus

"Connect With Us" full-width blue gradient panel with frosted-glass pill-shaped social buttons that fill orange on hover

Result: Everything a visitor needs to reach us location, phone, map, form, socials all in one elegant page.

Hover Effects & Micro-Interactions

Small touches that make a big difference

Element	On Hover
---------	----------

Nav links	Text turns orange, animated orange underline
-----------	--

Service cards	Lift up + top border turns orange
---------------	-----------------------------------

Team cards	Slide right + photo ring turns orange
------------	---------------------------------------

Value cards Orange top bar slides in

Buttons Blue → orange transition with lift

Social buttons Fill with orange + lift

Maps Orange border glow

Result: The site feels alive and interactive not static.

Slide 13 Responsive Design

Mobile, tablet and desktop all covered

Breakpoints used:

992px tablets: nav centres, cards reflow

768px small tablets / large phones: nav stacks vertically, 1-column layout

480px phones: smaller headings, full-width buttons

What changes:

Team cards stack vertically with photo on top

Service cards go from 3 → 2 → 1 column

Location cards stack on top of each other

Nav collapses into a clean column

Buttons become full-width for easier tapping

Result: A professional experience on every screen size.

CSS Techniques We Used

Modern CSS features in our project

CSS Variables (:root) a single place to change the brand colours

Flexbox header, nav, team cards, buttons

CSS Grid service cards, values, social buttons

Gradient backgrounds buttons, banners, footer

Linear gradients for text the organisation name in the header

Radial gradients decorative glows behind headings

Keyframe animations the pulsing glow effect

Backdrop filter frosted-glass social buttons

Pseudo-elements (::before, ::after) underlines, dots, decorative circles

Transitions smooth hover feedback everywhere

Result: A modern, polished site that looks and feels professional.

Before & After

From plain HTML to a branded website

Before (HTML only)	After (with CSS)
Black text on white	Branded blue, orange and white palette
No navigation styling underline	Sticky header, animated nav, gradient
Headings left plain	Accent bars under every heading
Plain lists	Hoverable value & feature cards
Plain forms buttons	Focus-glow inputs, pill legends, styled
No logo branding every page	Organisation name in gradient text on
Doesn't fit small screens	Fully responsive on mobile & tablet
Result: A complete visual transformation.	

Conclusion

What we achieved in the CSS phase

- Created a consistent brand identity across all 5 pages
- Established a strong colour palette (white, blue, orange)
- Made the site fully responsive on every device
- Added modern interactions (hover effects, transitions, animations)
- Built reusable, modular CSS one file per page
- Improved readability, structure and professionalism
